Descriptors-*Administrative Personnel, *Adult Educators, Elementary Education, Enrollment, Fringe Benefits, Inservice Teacher Education, *Public School Adult Education, Research, *Salaries, Secondary Education, *Statistical Data

Results of this 1965-66 study of public school adult education programs, based on responses from 338 schools in large districts (12,000 or more regularly-enrolled pubils) includes elementary, secondary, and general adult education enrollment figures, in-service training statistics, percentages of time devoted to adult education in school districts where administrative leadership is still not full time, and salary ranges and fringe benefits for teachers and administrators. Data are arranged by city, state, and enrollment stratum (100,000 or more pupils, 50,000-99,999 pupils, 25,000-49,999 pupils, or 12,000-24,999 pupils). The appendix gives response data and additional information for each enrollment stratum. Document includes 10 tables. (ly)

PUBLIC SCHOOL ADULT EDUCATION PROGRAM STUDY

FOREWORD

A persistent problem facing adult education in the United States is how to collect the most meaningful data which will accurately reflect the breadth and depth of the educational activities in which American adults are participating. From 1945 to 1964 the Division of Adult Education Service of the National Education Association conducted a study of teachers' salaries in public school adult education programs. These studies chronicled the rise of hourly pay for adult education teachers from a median of $2.03 an hour in 1945 to a median of $5 an hour in 1964. However, this was only a very small part of the story.

As the scope of adult education programs within the public schools has expanded, there has been a significant change in the traditional concept that adult education is essentially a part time activity. It appears as if we have crossed the threshold and entered an era in which administration, teaching and class participation in adult education classes increasingly represent full time adult commitment.

This current program study has been expanded to include elementary, secondary, and general adult education enrollment figures, in-service training statistics, percentage of time devoted to adult education in school districts where administrative leadership is still not full time, as well as salary figures for teachers and administrators. This is the first public school adult education program study of this magnitude conducted by the National Association for Public School Adult Education. It is hoped that this will become an annual program study. So that it may be improved and made more useful, we invite your comments and suggestions. Please send them to us in writing so that we might incorporate them into our next study.

James R. Dorland
Assistant Executive Secretary
National Association for
Public School Adult Education

SUMMARY AND COMMENTARY

TABLE 1 - Response Data

The Public School Adult Education Program Study is based on 1965-66 school year statistics. All 491 large (12,000 or more pupils enrolled in regular school classes) school districts in the nation were asked to participate. These school districts have been divided into the following four strata based on enrollment of pupils in regular school classes:

Stratum 1	-	100,000 or more pupils
Stratum 2	-	50,000 to 99,999 pupils
Stratum 3	-	25,000 to 49,999 pupils
Stratum 4	-	12,000 to 24,999 pupils

Because the survey does not include any school districts enrolling fewer than 12,000 pupils, it does not attempt to offer an "ideal" formula that can be used nationally. However, it should provide an accurate picture of adult education programs in large school districts.

Of the 491 questionnaires mailed, 386 were returned, providing a 78.6% response. Of the 386 schools in 41 states that responded, 338 (87.6%) have adult education programs and 48 (12.4%) do not have adult education programs.

Questionnaires were mailed to the superintendent of schools in each school district and a follow-up request was sent approximately one month after the first questionnaire was mailed.

TABLE 2 - Salary Information for Full Time Adult Education Directors

The total number of full time directors responding to the request for salary information was 141. The median bottom salary for full time directors was $11,000 and the median top was $14,364. Perhaps the most significant statistic is that with 338 school systems reporting programs of public school adult education, the number of full time directors is 141. This means that 197 school systems still have only part time administrative leadership for their adult education programs.

TABLE 3 - Number of Adult Education Teachers

A growing trend in public school adult education has been in the direction of employing more full time adult education teachers. However, of the total number of adult education teachers reported -- 42,298 -- the number of full time teachers still represents only 5.3% of the total.

TABLE 4 - Enrollment Figures for Adult Education Classes

The scope of public school adult education programs is revealed by the total enrollment of 2,014,043 adults in the 338 reporting school districts. Of this total, it is significant that more than one-half million -- 514,358 -- were enrolled in high school credit classes and that 34,646 received high school diplomas. These programs were financed almost exclusively through local and state efforts becaude federal subsidy of any significant proportion is still not available for high school adult education classes. The elementary enrollment of 230,702 probably reflects the federal help provided for adult basic education classes.

TABLE 5 - Salary Information for Adult Education Teachers

From the variety of statistics provided in this table, perhaps the most important observation is that most adult education teachers have not yet moved up to the $6 per hour category, with the median hourly pay reported as $5.38. An increasing number of systems (117) are paying teachers on a sliding scale rather than at a flat hourly rate, and the highest figure reported in this category is $25 per hour. As for fringe benefits, Social Security and Workmen's Compensation are the only items consistently provided for in more than half of the school districts reporting. The third highest item included is Teacher Retirement. As for inservice training, the mean number of hours per system per year is 16 hours. Apparently this phase of adult education is still in its early stages.

a/ Fringe benefits for which part-time teachers, who are paid an hourly rate and are not regular employees of the school system, are eligible. Each X represents eligibility for one fringe benefit. The seven possibilities are as follows: teacher retirement (other than social security), social security, sick leave, hospitalization, group life insurance, Workmen's Compensation, and holiday pay. If all seven are available, there will be seven X's (XXXXXXX). If, for example, only social security and Workmen's Compensation are available there will by only two X's in the appropriate spaces (X X).

b/ Salary scale of full-time teachers of adults: S--Same as salary scale of regularly employed classroom teachers of children and youth. D--Different salary scale than that of regularly employed classroom teachers.

c/ Inservice training program for public-school adult education teachers. An X indicates those systems having such a program.

d/ Number of hours of inservice training provided during each school year.

RE: AC 001 029

This document is a publication of NAPSAE and for sale by them. However, it does not have in it the copyright release as noted on page 3 of the June 7, 1968 Management Notes. Yesterday I talked to Bob Luke of NAPSAE about this and he told me to send it in with our regular Level II sticker. Hope this is acceptable.
